

PROJECT MILESTONES - EXAMPLE INTERVIEW CAMPAIGN

Please provide the following information:

- The topic you would like the interview to be about and links to relevant resources
- A headshot of the interviewee
- Official title and short biography of the interviewee

ScotCHEM: Fueling Innovation in Scotland's Chemical Sciences

Interview conducted by Lexie Corner | May 28, 2024

insights from industry

Dr. Alan Wiles
Director of Operations
ScotChem

About Dr. Alan Wiles

Dr. Alan Wiles graduated high school in France with a baccalauréat in Science and Engineering. He then graduated with a BSc Hons in Chemistry (Heriot-Watt) and an MPhil in organic synthesis (Manchester University), completing his education by achieving a Ph.D. in organic electronics (University of Glasgow).

Dr. Wiles then continued his academic career as a researcher at the University of Glasgow, researching organic electronic materials in energy harvesting, energy storage, and other optoelectronic applications.

He then moved to ScotChem in 2020 to provide more support to early career researchers within ScotChem. As director of operations, Dr. Wiles has greatly increased ScotChem's reach and recognition beyond its academic networking roots and is now responsible for the entire portfolio of activities that ScotChem delivers.

Your Editorial Account Manager will provide you with interview questions based on the provided resources. The questions can be responded to in writing or over the phone/video call.

You will receive a draft of the interview to edit and/or approve.
