### Robot Protection for Harsh Operating Environments

### Robot Protection for Harsh Operating Environments

Robots play an increasingly significant role in modern industry, often finding application in areas that are unsafe for human workers. This puts them at risk of exposure to corrosion, heat damage, abrasion and other types of exposure-related damage, which can dramatically reduce operational lifetime.

THERMOPAK<sup>®</sup> Robot Covers from Mid-Mountain Materials offer a robust and cost-effective solution, enabling manufacturers to protect robots from harsh conditions and maximize their value.

### 3. Lasers for robotic automotive production

Modern automotive production is highly automated, and lasers are now used in conjunction with this technology, replacing conventional tools and bringing a host of additional benefits to the manufacturing process.

There are three ways in which the laser can be integrated in robotic applications:

### METHOD 1

Laser mounted directly onto robot arm, beam is transferred to workpiece by a sophisticated articulated beam delivery. Robot programmed to cut relatively complex shapes while always keeping the beam in focus
